## Revision History

Updates between document versions are cumulative. Therefore, the latest document version contains all updates made to previous versions.

Doc Version	Product	Release Data	Details
V1.0	iScan Platform V8.0	2018.02.07	First Release

# 1 Overview

The iScan platform is for remote monitoring and managing MDVR (Mobile Digital Video Recorder) series products designed for Internet of Vehicle application. Hongdian MDVR Vehicle Management System contains iScan Platform + MDVR product for the customers.

This document shows you a brief view of the remote video management on Hongdian vehicle management platform.

You should be able to access the iScan management platform before this operation;

Please prepare:

Platform access account;

iScanClient.exe;

## 2 Description

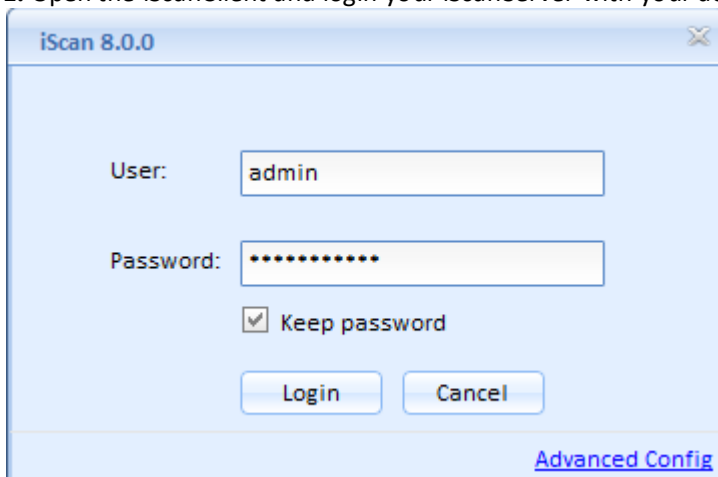

### 2.1 Preparation

Get the iScan Platform Server IP and login account;

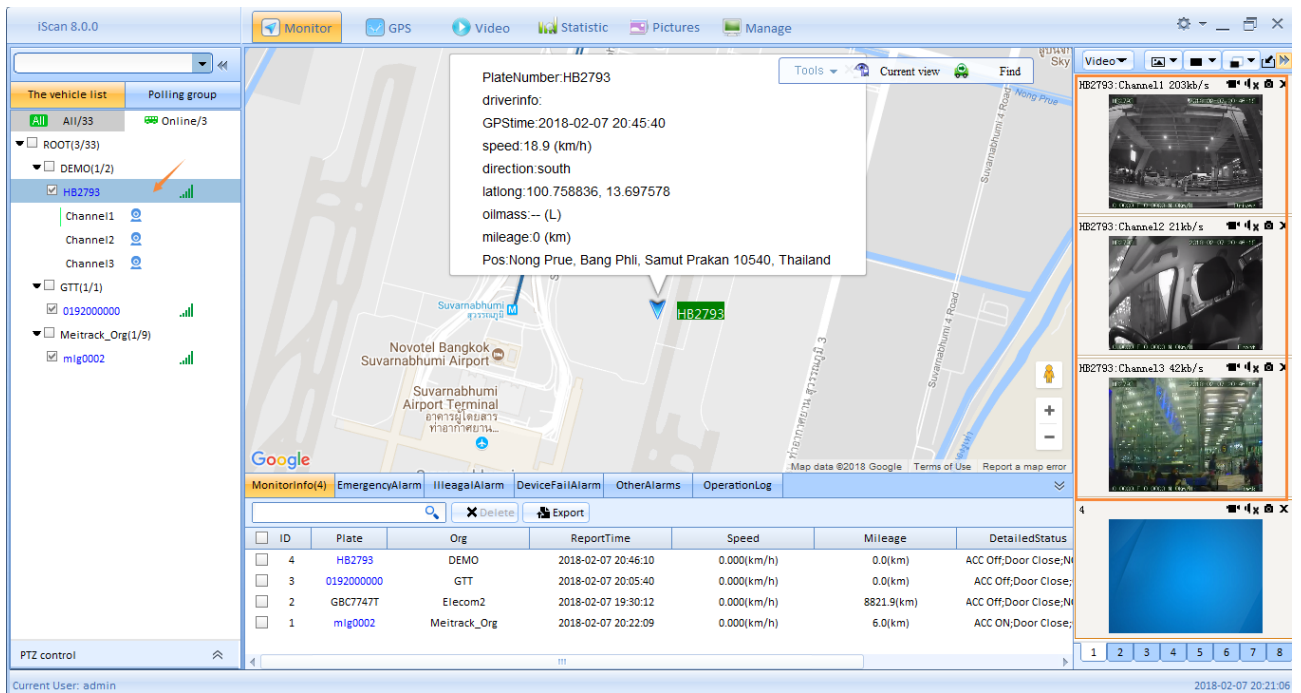

Install the iScanClient on your PC.

### 2.2 Operation

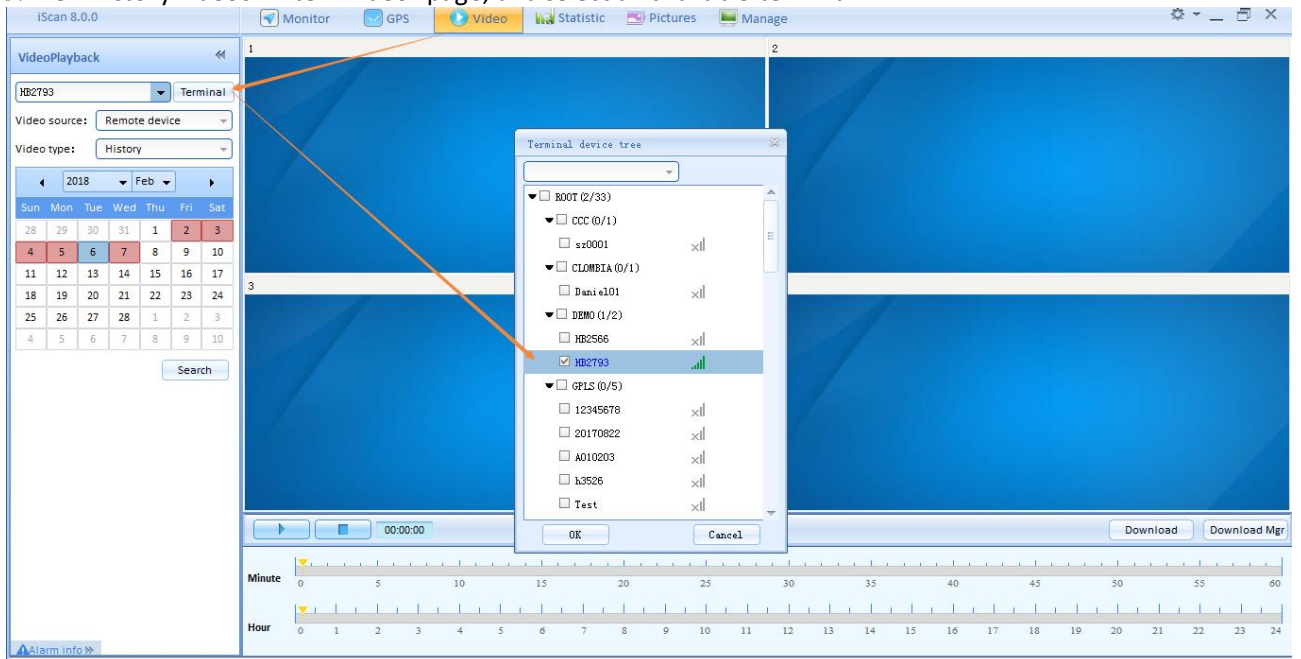

1. Open the iScanClient and login your iScanServer with your account as below:

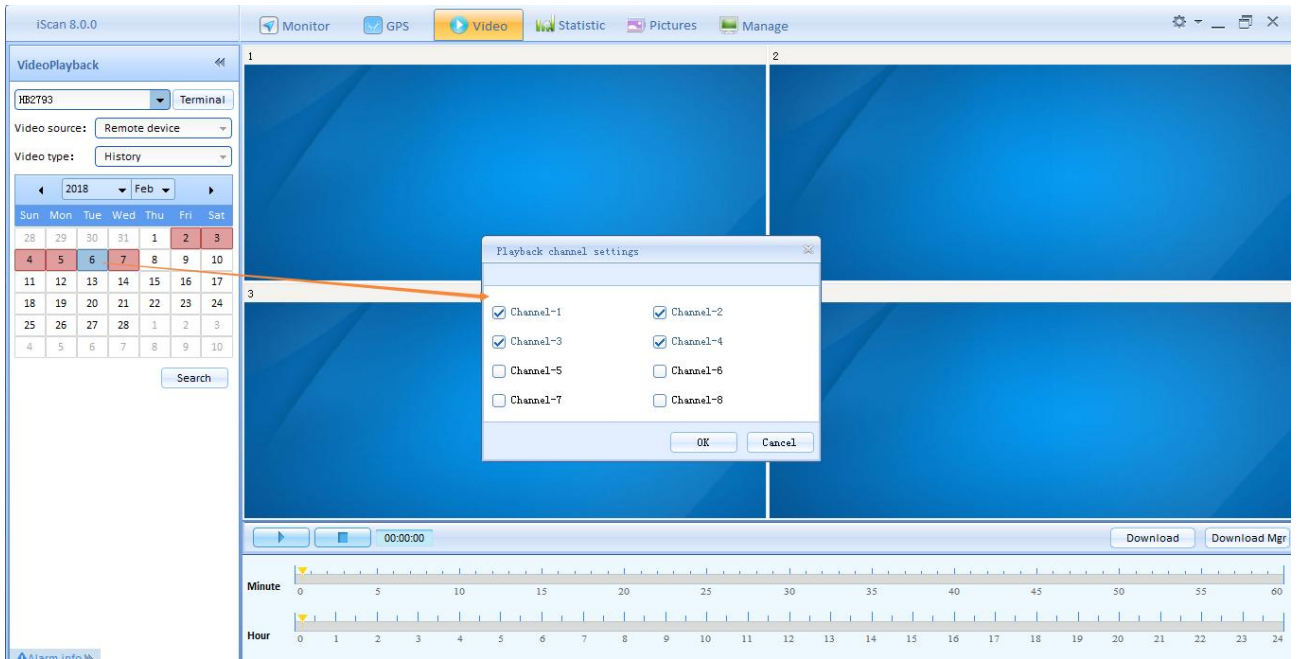

2. View real-time remote videos. Enter "Monitor" page, double click the online terminal name or click the available camera to get real-time videos as below.

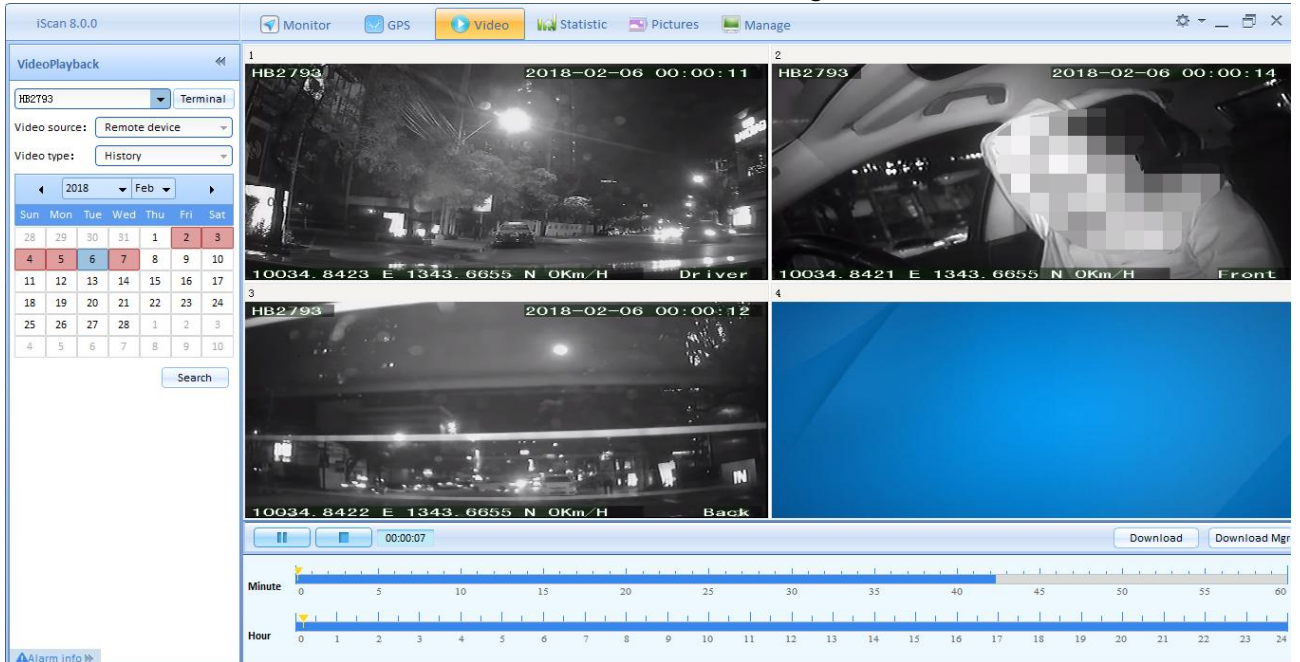

### 3. View history videos. Enter "Video" page, and select an available terminal

Select the available date and check the channels.

Wait a moment, we can view the videos from the remote device's storage.

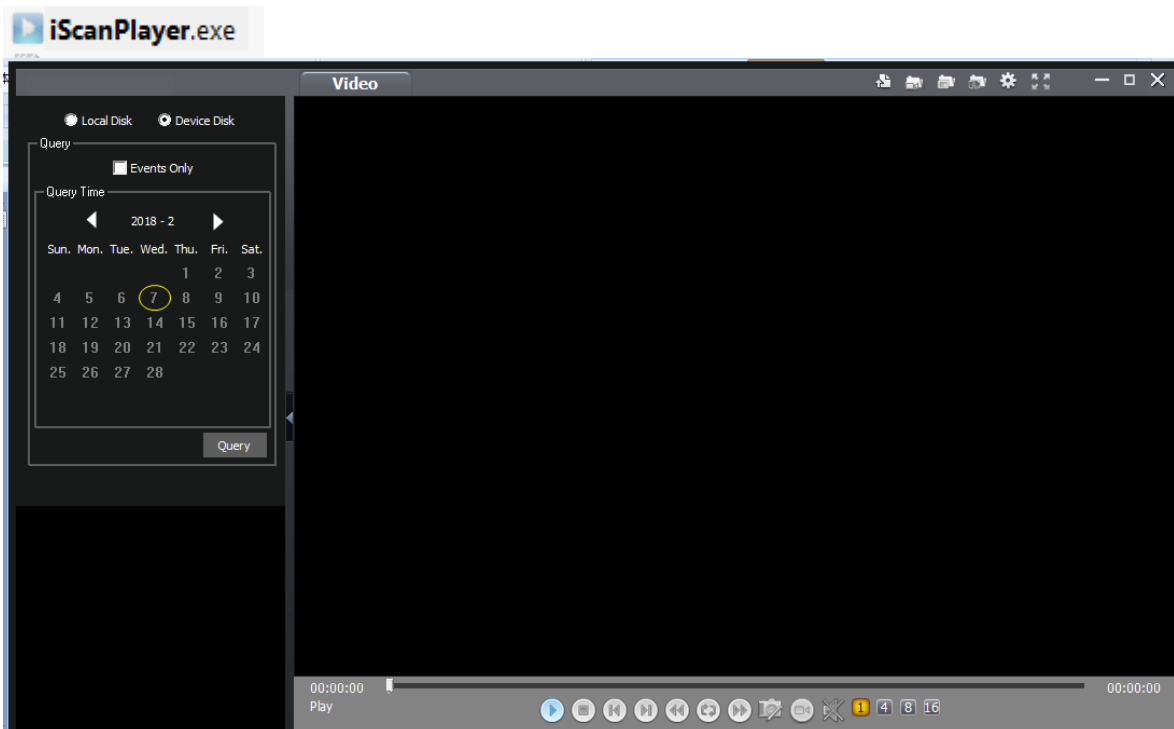

We can also download the video by click the "download" button.

4. After downloaded

5. This video format requires iScanPlayer of our corporation to play.

*Create smart things*
